

Paper Animals and Sandcars -

New CD from **Andi Neate**

Andi Neate is a Scottish singer songwriter of exceptional talent, combining jazz and folk influences in a style that is entirely her own. She is a compelling live performer, singing with the subtlety of Suzanne Vega with a stage presence reminiscent of Ani DiFranco.

Andi made her debut at London's **Mean Fiddler** nearly 18 years ago. Since then she has toured as far afield as the Falkland Islands, Canada, America, Sicily, Georgia and the Czech Republic. She has recorded with the **Bhundu Boys** and Ireland's chart topping **Mickey Harte**, supported **John Renbourne** at the **Ullapool Guitar Festival**, Grammy Nominee **Eliza Gilkyson**, **Wolfstone** and **Horse MacDonald**.

She has also toured with Edinburgh band **Salsa Celtica**, and shared a stage with **KT Tunstall**. She has released three solo albums, including her most recent **Paper Animals**, featuring a range of original songs about life and the road – from working in Coffee Police Boxes to origami and building sandcars.

She has recently been performing at a couple of showcase events in London, at the Halfmoon Putney and the Bedford. She has also appeared at the 2006 Prague Festival, Cambridge Fringe Festival and the Famous Spiegeltent at the Edinburgh Fringe. And she's also been practising some new origami techniques.

Paper Animals features original songs and some of the best musicians currently working in Scotland including John Rae, Jon Beales, Phamie Gow and Wendy Weatherby; it has a distinctly jazz feel, with folk influences – and the extra bit of magic which is Andi Neate!
